DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 6, 7, 11-15, 23, 24, 26 and 27, drawn to the method of handoff in wireless communication system wherein the currently serving base station (an active network) sends a request to a mobile telephone switching center to handoff a call, classified in class 455, subclass 438.
 - II. Claims 3, 5, 8-10, 16-18, 20, 21 and 25, drawn to the method of handoff in wireless communication system wherein the mobile station plays a role in the determination of the new serving base station (a preferred network), classified in class 455, subclass 437.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are distinct, each from the other because of the following reasons:

Invention I has utility about the method of handoff in wireless communication system wherein the currently serving base station sends a request to a mobile telephone switching center to handoff a call, while invention II has separately utility about the method of handoff in wireless communication system wherein the mobile station plays a role in the determination of the new serving base station.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different subclasses, restriction for examination purposes as indicated is proper.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huy Q Phan whose telephone number is 703-305-9007. The examiner can normally be reached on 8AM-5PM.
